#895 - Pliolite

Barricade Masonry Waterproof Coatings are specially formulated coatings specifically designed to waterproof both interior and exterior, above and below grade cementitious substrates. It penetrates surface pores to become an integral part of the masonry substrate and forms a tough waterproof barrier. It reconditions masonry substrates that show signs of spalling, or deterioration due to excessive surface moisture. It provides excellent coverage, is alkali and mildew resistant. **Mildew Resistant** – This paint contains agents that inhibit the growth of mildew on the surface of this paint film.
