

Richard's Paint... ultimately defining what customer service means

Richard's Paint Mfg. Co., Inc, located in Rockledge, Florida, has been manufacturing high quality paint products since 1954. In addition, we also provide reliable distribution to approximately 400 independent paint dealers in eleven states throughout the Eastern and Southeastern United States. We are primarily engaged in the manufacturing of high quality architectural coatings, such as 100% Acrylic and PVA interior & exterior house paints and construction coatings. We also offer a complete line of superior industrial coatings, such as urethane and 100% acrylic industrial enamels, waterborne epoxies, solvent epoxies, and aliphatic urethane. Our 100,000 square foot facility enables us to have a considerable manufacturing capacity producing over two million gallons per year.

All of our products are manufactured using only choice pigments, resins, and raw materials to give maximum beauty and protection. Comprehensive quality control practices ensure our products are meticulously formulated for all climates, with added state-of-the-art fungicides to help safeguard and fight mold, mildew and fungus.

Richard's is a dedicated supporter of the construction industry supplying coatings at all stages of new construction or re-paint projects. Our products continue to sell successfully in many retail markets with increasingly impressive results. At Richard's Paint, we take justified pride in offering the best paint products, as well as first-rate customer service to all of our professional paint contractors, independent distributors and of course, Mr. and Mrs. Homeowner.
